Subject: ACP Update Notes - Jan. 3, 2018

**ACP Weekly Update Notes
Jan. 3, 2018**

- **DAQ:** No written response has been received from Dominion following DAQ's request for additional information on the air quality permit application for the Northampton compressor station facility. Mike A. has reviewed draft hearing officer's report; it is in good shape.
- **DWR:** In response to the fifth add-info request, Dominion submitted a revised cumulative analysis report on Dec. 20. Information submitted is under review to ensure that all the requested information has been provided. Final edits are being made to the hearing officer's report. Staff is meeting with Linda Culpepper tomorrow to discuss further.
- **DEMLR - E&SC:** Staff will issue another letter of disapproval to Dominion by Jan. 4, which is the 15-day deadline date. The letter will include about 19 comments/items, which is down from 34 on the last letter of disapproval. There is no set deadline for Dominion to respond once the letter of disapproval is issued. Staff said the timeline is working out that we may be ready to issue an approval for the E&SC and construction stormwater permit application when the 401 certification issues are resolved. Per standard procedures, DEMLR will not issue the E&SC or construction stormwater permit approval prior to 401/404 approvals.
- **DEMLR - Stormwater:** No information has been received from Dominion in response to the DEMLR's requests for more information on the stormwater general permit and stormwater individual permit. Options for a public comment period are under discussion.
